

VXI Technology, Inc. is pleased to announce the expansion of our high density SMIPPII (Switch Modularity & Interface Platform) offering with the release of the SMP6905 Power Splitter / Combiner. The SMP6905 combines six 2-way 0° 10MHz - 1GHz powers splitters / combiners in a compact SMIPPII module.

The SMP6905 exhibits excellent phase balance and VSWR performance in a compact footprint, and has a matched power rating of 1Watt. High isolation between each output and low insertion loss are also key features. This module is an ideal addition to the SMIPPII line, and can be mixed and matched with other modules to become the heart of a powerful RF signal switching system.

We invite you to visit our website www.vxitech.com for detailed information on the SMP6905, as well as our complete line of high density modular instrumentation and switch solutions.
